

There are Only Two Sources You Can Depend on

...and We're Not 93 Million Miles Away

Any solar simulation system is only as good as its light source. Only EYE Lighting/Iwasaki Electric designs and manufactures the light source and optics system in addition to complete solar simulation equipment. This unique integrated approach ensures that your simulator is designed from inception around the proper lighting system for your particular application requirements.

And, with local engineering, manufacturing, and support, there is no reason to look any further.

Call today or visit www.eyelighting.com and click on the **applied optics** tab for your solar simulation application.

Employing light technology to create a safe, comfortable and sustainable environment.

ISO 9001:2000, ISO 14001:2004, OHSAS 18001:1999 Certified; ISO 17025:2005 Accredited
